

Measurement 1: Stand at the top of stairs and extend the tape measure down to the landing, letting it rest on edge of each tread. The tape should not sag or bend along the way. Record the distance from the edge of the upper landing to where the end of the tape measure rests on the landing at the bottom of the stairs.

Measurement 2: Measure from the edge of the upper landing (like Measurement 1) to the edge of the first stair's tread at the bottom.

Measurement 3: Measure the width of your stair's treads.

Measurement 4: Measure from the edge of the first stair at the bottom to the wall (or door), if there is one.

Measurements 5-7: These are the tread measurements.

Measurement 8: Measure from the top step to the nearest door, wall or other obstruction at the top of the stairs.

Measurements

Measurement 1:	<u>130</u>	inches
Measurement 2:	<u>120</u>	inches
Measurement 3:	<u>38</u>	inches
Measurement 4:	<u>36</u>	inches
Measurement 5:	<u>7.5 w/ carpet</u>	inches
Measurement 6:	<u>10.5</u>	inches
Measurement 7:	<u>13</u>	inches
Measurement 8:	<u>59</u>	inches

All Measurements to Stringer

Dimensions required for all curved stairlifts

Please include all measurements detailed by the red arrows. **All** details are required.

Please detail any intrusions above stringers. i.e handrails, pelmets, window cills etc.

If any walls, newel posts etc are not vertical, and are leaning into the staircase measurements should be taken 1m up from the stair level.

All measurements must be from stringer/skirting detailed on 3rd sheet

Confirmation of contract review (To be signed by a member of management team). All aspects of the above survey and drawing are acceptable are achievable

Signed

Rail Configuration

Standard Start

Select X. Rail continues at same angle until it reaches floor.

L = in Run on start

Select X. Rail levels to run parallel with floor. Please supply length measurement L. Please note minimum measurement.

52° Start

Select X. Rail changes angle at bottom for installations with limited space.

Hinge (App. Used Only) (Obstruction from 1st nose)

Select X. Rail has hinged section. Please supply radius measurement R.

90° 180° Wrap Start

Select X. Rail wraps around 90° or 180° at start. Can be combined with Run on start.

90° 180° Wrap Finish

Select X. Rail wraps around 90° or 180° at finish. Can be combined with Run on finish.

Standard Finish

Select X. Rail finishes at an angle allowing chair to swivel onto landing.

L = in Run on Finish

Select X. Rail levels to run parallel with floor. Please supply length measurement L. Please note minimum measurement.

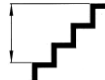

Table 1		Measured off the Staircase						
		1st Flight or Fan	2nd Flight or Fan	3rd Flight or Fan	4th Flight or Fan	5th Flight or Fan	Total Number of Risers	
Number of Risers		Number of risers in each flight. Straight flights - number of parallel risers. Fanning flights - number of risers between straight flights.					Number of risers in entire staircase.	
1st Riser Height		Vertical height of 1 st riser in each flight, as in diagram to left.					Total Height Measured	
Vertical Height (a)		Vertical height of remaining risers in each flight, as in diagram to left. Do not include 1 st riser height.						
Horizontal Length (b)		Horizontal length from nose of first riser to nose of last riser in each straight flight, as in diagram to left. Leave blank for fanning flights.					Staircase height from floor to top riser.	
Nose-Nose		Diagonal length from nose of first riser to nose of last riser in each straight flight, as in diagram to left. Leave blank for fanning flights.						
Angle		Angle of each straight flight, as in diagram to left. Leave blank for fanning flights.						
Min Width		Minimum clear width of each flight. Measure this from any obstructions and detail these obstructions on plan drawing. If there are no obstructions, measure from stringer to newel/wall.						
Stringer Width		Stringer thickness, from wall, on each flight						
Stringer Height		Only use if stringers are over 300mm high						

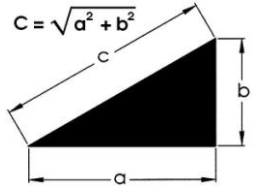

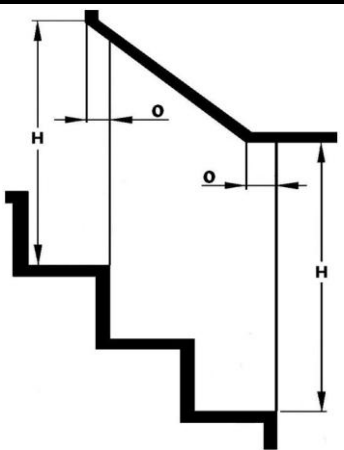

Table 2		Measurements Validation (Pythagoras from Table 1)	$C = \sqrt{a^2 + b^2}$
Calculated Nose-Nose (c)	Please use the formula to the right to check nose-nose dimension for each straight flight. These two dimensions should be within 30mm.		
Average Rise	Average Go	Please detail average rise and average go for each flight. Add 1 st riser to vertical height and divide by number of risers.	

Table 3	Bulkhead Measurements	Additional Information																		
	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th>Riser No.</th> <th>Height (H)</th> <th>Offset (o)</th> </tr> </thead> <tbody> <tr> <td colspan="3">Bulkhead starts on riser number ? is ?in high, ?in back from the nose.</td> </tr> <tr> <td colspan="3">Bulkhead finishes on riser number ? is ?in high, ?in back from the nose.</td> </tr> <tr> <td> </td> <td> </td> <td> </td> </tr> <tr> <td> </td> <td> </td> <td> </td> </tr> <tr> <td> </td> <td> </td> <td> </td> </tr> </tbody> </table>	Riser No.	Height (H)	Offset (o)	Bulkhead starts on riser number ? is ?in high, ?in back from the nose.
